2. CITATIONS AND EXPLANATIONS

Claims 1-57 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest compositions comprising non natural cis or trans-cleaving hammerhead ribozymes comprising a core, stems I-III, loops I-II, and bulges within stems I and II, wherein bulges comprise ASBR- or CarSV+ viroid sequences, and which stems comprise different ribozyme sequences from each other; nor do they suggest vectors and host cells comprising these ribozyme structures (which are depicted as structures I through VIII); nor methods of making these ribozymes; nor do they teach methods of making libraries of these hammerhead ribozymes and selecting for cleavage capable ribozymes by incubating the claimed cis or trans-acting hammerhead ribozymes with library sequences and selecting for ribozymes that cleave library sequences at an initial rate of 0.5 per minute..

Claims 1-57 meet the criteria set out in PCT Article 33(4), and thus meet industrial applicability because the subject matter claimed can be made or used in industry.
